## CUSTOMER INFORMATION

Edition 6.0, revised January 12<sup>th</sup> 2017

***Here in particular: European Regulation (EC) No. 1907/2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) - Duty to supply information about substances in articles***

Acciai Speciali Terni S.p.A. supplies you with semi-finished stainless steel flat products which are articles in terms of REACH. Our stainless steel does not contain substances of very high concern (SVHC) as defined and listed per Article 57 and 59 (ECHA candidate list) of the REACH Regulation. The components included in stainless steel need not to be authorized. The substances in our articles are not "intended to be released under normal or reasonable foreseeable conditions of use". Therefore there exists no registration obligation for substances in articles.

Acciai Speciali Terni S.p.A. is a downstream user of the substances included in stainless steel. They undergo the registration process as phase-in substances. Their use in stainless steel production will be included in the registration. We will contribute to the chemical safety assessment of substances in articles as required under conditions of Article 14.

As described above, there are no additional requirements under REACH for recipients of our flat products made from stainless steel. In addition, the "duty to communicate information on substances in articles" according to Article 33 does not apply to stainless steel semi-finished products. For the safe use of our products we refer to our Safety Information Sheet for stainless steels (see attached file).

Acciai Speciali Terni S.p.A. satisfies the requirements of EC Regulation No. 1907/2006, also with regard to its duty to provide information concerning the surface protection and packaging systems used.

Finally, we point out that with regard to the REACH requirements for substances produced or imported, our company has provided for the registration of the following substances:

- LME Nickel (as an importer) - no. Registration: 01-2119438727-29-0063 (of 26.11.2010);
- Slag (as producer) - no. Registration: 01-2119488921-27-0006 (of 18.11.2010).

while, in respect of all other substances imported and/or purchased, in the case of European suppliers our position is downstream user, without registration; the non-EU suppliers have instead appointed his own Only Representative in the EU.

For the case that further information is desired we remain at your disposal.

Ing. Massimo Calderini

Plant Manager
