As provided for in the Assessment Agreement, DNV GL may suspend the statement if there are reasonable grounds to do so, in which case the statement will no longer be valid. The information on this page has been time-stamped and sealed on the VeChain public Blockchain.

Assessment methodology

To assess how Organisations manage infection risk, DNV GL applies an infection risk management methodology framework utilising a maturity model based on six domains and five levels of maturity:

- Actions
- Strategy
- Data analysis
- Communications
- Governance
- Continuous improvement
