Information to our customers concerning:

European Regulation 1907/2006 REACH

Acciai Speciali Terni S.p.A. produces many stainless steel grades. For all the substances employed in the manufacturing of our stainless steel we require our suppliers to have the necessary registrations in compliance with EU Regulation 1907/2006 for the materials we purchase.

Acciai Speciali Terni S.p.A. stainless steel does not contain substances of very high concern (SVHC) as defined and listed per Article 57 and 59 (ECHA candidate list) of the REACH Regulation.

Acciai Speciali Terni S.p.A. stainless steel complies with the restrictions in Annex XVII of the REACH Regulation. By reference to nickel content restriction (Entry 27 in the Annex), tested stainless steels comply with the above mentioned Entry. However, test have shown that re-sulphurised machining stainless steels (Sulphur>0.1%) could release nickel close to the defined threshold, so we recommend not to use re-sulphurised machining stainless steels in direct and prolonged contact with the skin.

Safety Information Sheets are available on Acciai Speciali Terni S.p.A. website where relevant information about health and environmental hazards concerning our products can be found.
