The Arvedi Group

In 1963, Cavaliere del Lavoro Giovanni Arvedi founded his first two companies for the manufacture and sale of welded carbon steel tubes. In the 1980s, in order to ensure a regular supply of high-quality raw materials to these companies, he began designing and building his own steelworks, Acciaieria Arvedi. The plant was developed using the Group's own original and competitive process technology, conceived and developed in-house and patented worldwide under the names Arvedi ISP and ESP. In 2022, AST Terni was acquired by Arvedi from ThyssenKrupp. A major investment plan is aimed at expanding production capacity while supporting initiatives to progressively reduce emissions and implement circular economy principles, in line with the objectives set out in the company's Sustainability Plan. The Arvedi Group operates throughout Europe across a broad range of activities, from primary products such as steel and hot-rolled coils to finished products, including precision re-rolled products, tubes and stainless steel forgings.

Today, the Arvedi Group is active in the production of flat hot-rolled and cold-rolled carbon and stainless steel products, carbon and stainless steel tubes, the precision re-rolling of stainless steel strip, and the trading of steel products. All Group companies have been designed with a strong focus on specialization and optimized in terms of production organization and plant configuration. They employ state-of-the-art technology and proprietary operating practices to enhance efficiency, quality and flexibility. A highly qualified and experienced management team, leading a lean and flexible organization, works to ensure production efficiency, consistently high quality and excellent service levels, with particular attention to market developments and customer requirements. The Group's technological, ergonomic and environmental choices are focused on people's safety and well-being, as well as on the responsible management of environmental aspects.

The Holding Company and the Group's industrial structure

Finarvedi is the holding company of the Arvedi Group, whose core business consists of steelmaking activities with production volumes exceeding 6 million tonnes of high-quality products designed to meet the requirements of the most demanding markets. The Arvedi Group employs more than 6,000 people and generates consolidated revenues of over €5 billion. The acquisition of AST Terni's operations in January 2022 has given the Group a significant role in the primary production of stainless steel and has contributed to the growth of both production volumes and revenues. The Group's existing companies, ILTA Inox and Arinox, are able to benefit from the synergies resulting from the presence within the Group of AST, a producer of stainless steel coils and therefore a key supplier of their raw material.

Arvedi AST: a new integrated company, a new force on the market, with a stainless passion for steel.

With more than 140 years of experience, Arvedi AST, part of the Arvedi Group, is one of the most important integrated steelmaking sites in Europe in the stainless steel sector. Its core business is stainless steel flat products, for which it is market leader in Italy and one of the leading producers in Europe. As well as flat rolled steel, the company also produces forgings in special steels, among the largest in the world, through its Forgings Division.

Tubificio di Terni, the Arvedi AST controlled company, deals with the production of ERW stainless steel tubes.

Thanks to its integrated service centers (Terninox and CST), the expertise and innovative capacity of its technical and sales teams, Arvedi AST products reach customers all over the world.

PLANTS AND PRODUCTS

Arvedi AST 

Stainless steel expertise and innovation in processes, products and services

The production plants are concentrated in Terni in an area of over 1.5 million square metres and cover the complete manufacturing cycle, from melting, rolling and finishing to packing. Equipped with the most advanced technologies, ArvediAST produces about one million tonnes of stainless steel flat products per year. Our factory produces semi-finished (Black coils) hot rolled and cold rolled austenitic, ferritic stainless steel products, with different dimensions and finishes to meet customer needs and expectations. The quality of products and services have led our stainless steel to be the raw material of excellence in several market sectors. In fact, each grade of stainless steel presents considerable differences in terms of chemical composition, mechanical properties and corrosion resistance, cold forming and weldability. Thanks to the integrated service centers (CST and Terninox), ArvediAST is able to offer a wide range of surface finishes to improve the product's aesthetics and technical

functionality. Various processes are also carried out including longitudinal and cut-to-length to supply the product according to the specific dimensions requested by the customer. The wide range is complemented by the support of an integrated team of technicians to provide solutions and maximum reliability.

The management and organisation approach followed by ArvediAST is based on safety, quality and continuous improvement which is taking the company to explore new and wider markets, guided by the logic of adopting leading innovation and process technologies based on independent R&D (collaboration with the Centro Sviluppo Materiali - CSM RINA, one of the leading Italian Centers for research in the fields of materials). The high level of quality of ArvediAST's products is the result of a combination of key factors: system state-of-the-art technology, the level of equipment and laboratories, and in particular the contributions of highly qualified, specialised engineers.

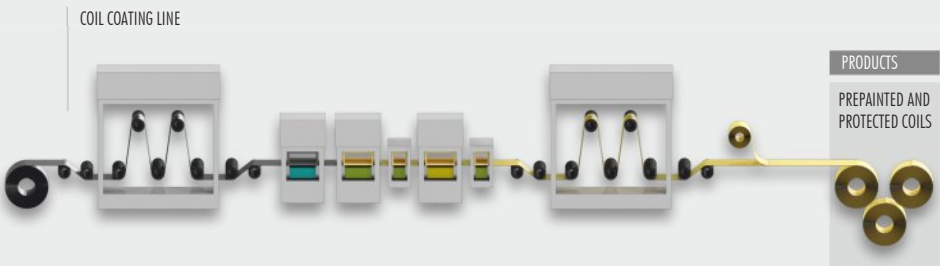

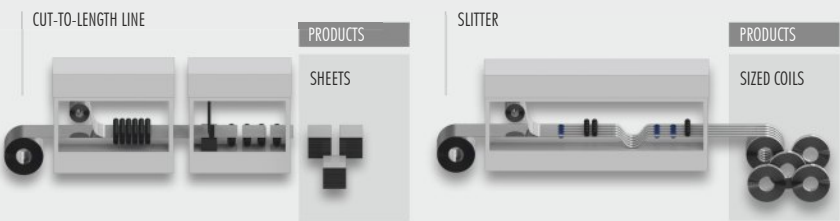

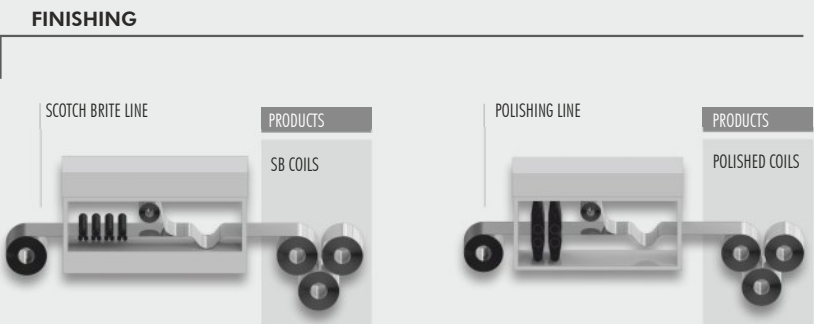

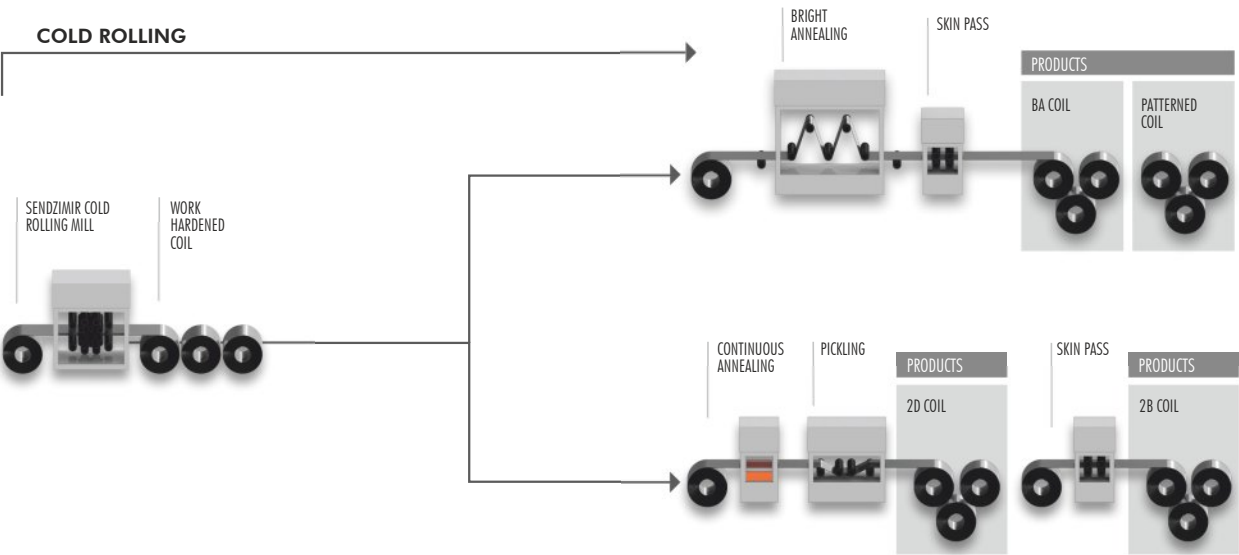

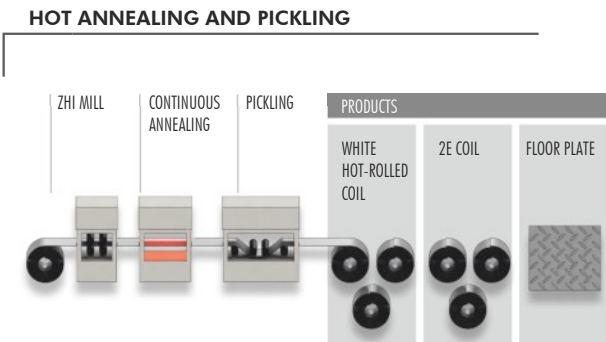

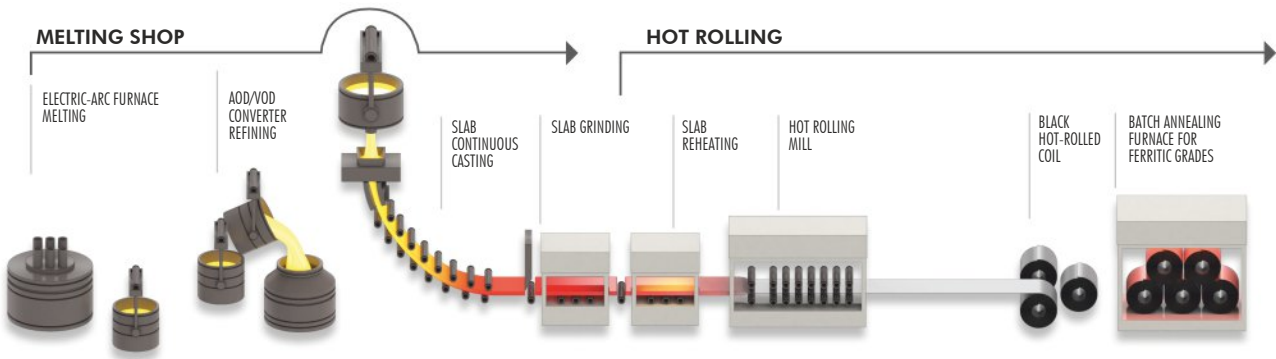

SDF 

Forgings Division, with a production unit which covers an area of 120,000 square metres, manufactures a wide range of forged artefacts, made from high quality steels, produced according to a century of metallurgical experience updated with the most modern processing techniques.

Tubificio di Terni 

The controlled company, Tubificio di Terni, that occupies an area of 45.000 sqm, is leader in the manufacture of ERW stainless steel tubes. The company is considered worldwide the primary specialist for the automotive, building and urban furnishing industries.

INTEGRATED PRODUCTION SITE UNIQUE IN THE WORLD

Efficiency of the production processes

Our customers can count on high production efficiency: we utilise a fully integrated production process. All stages of the process are carried out at the Terni site, from casting in a steel mill to surface processing carried out at the at the finishing centers to provide tailor-made solutions. Our processes are constantly monitored and certified.

Arvedi AST

EXPERIENCE, INNOVATION: VISION OF TOMORROW

Innovation is found in the production processes, in packaging, in logistics; it is the link with our customers to create cutting-edge products and services. The collaboration with the Centro Sviluppo Materiali (CSM RINA), one of the leading Italian centres for research in the field of materials, ensures excellent quality standards worldwide.

Arvedi AST started to build the history of Italian steelmaking over 140 years ago; today it has become the factory of the future with the new mission: to be a partner of companies from all over the world, offering each of its customers a wide range of efficient and quality products and solutions with the added value of a "responsible" production, strengthened by the new investments.

"The Spirit gives you the strength to innovate and see something that doesn't exist yet.

Then technique and technology intervene.

It is the moment in which the Spirit confronts reality and gives substance to innovation.

Everything comes from something that you imagine doesn't exist yet.

Even in the face of the greatest challenges, man always surpasses himself"

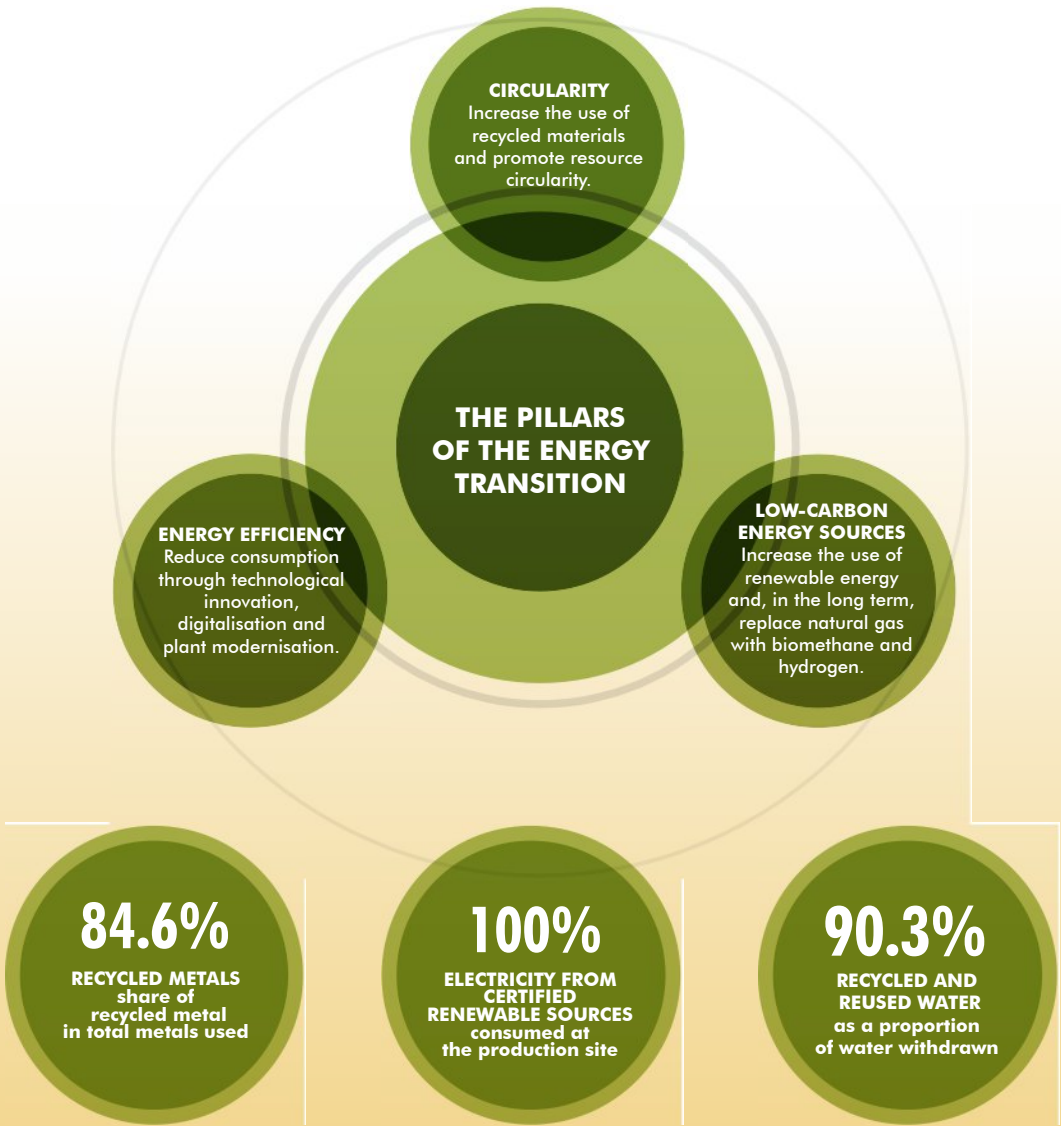

Cav. Giovanni Arvedi

SUSTAINABILITY AND ENVIRONMENTAL AWARENESS

Safety, health and the environment have long been key priorities in the company’s history and corporate culture.

Environmental, social and governance issues are an integral part of Arvedi AST’s strategy. For many years, the company has voluntarily reported on its ESG performance, following an approach based on measurement, transparency and continuous improvement. Arvedi AST has implemented certified management systems and incorporates objectives relating to the climate transition, energy efficiency, the circular economy and the responsible use of resources into its strategic planning.

* Ref.: Arvedi AST Sustainability Report 2026

CIRCULAR ECONOMY
Arvedi AST develops projects dedicated to the recovery and valorisation of materials, with particular emphasis on slag recycling initiatives.

Urban Re-generation
A collaborative project between companies focused on sustainability and enhancing the local area.

Acciai Speciali Terni S.p.A. has obtained ResponsibleSteel™ certification and operates in accordance with this standard.

ResponsibleSteel™ is an international certification programme for the steel industry, and Acciai Speciali Terni S.p.A. operates in accordance with this standard. Arvedi AST is therefore strengthening its path towards responsible steel production by integrating the requirements of the ResponsibleSteel™ standard into its business processes. This certification supports the company’s continuous improvement journey for the benefit of stakeholders and the local community.

ECOVADIS – GOLD MEDAL

Arvedi AST received the EcoVadis Gold Medal in its latest annual sustainability assessment, placing it among the top 5% of companies rated by EcoVadis.

The result places the company in the 96th percentile. The EcoVadis assessment covers four areas: Environment, Labour and Human Rights, Ethics, and Sustainable Procurement.

Surface Protections

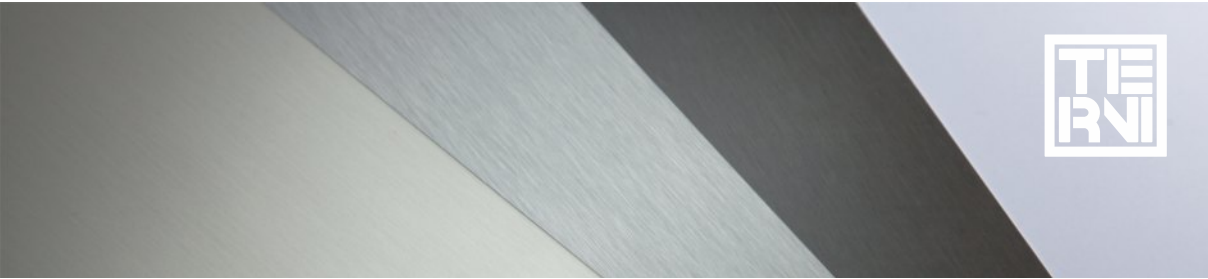

Cold rolled products are protected with interleaving paper; on request they can be delivered without protection or protected on one side or both by a removable plastic film based on the customer requirements.

Surface Finishes

A wide range of surface finishes for aesthetic and technical solutions.

FINISHES					
DESCRIPTION	AISI ASTM A 480	EN 10088-2	ACCIAI SPECIALI TERNI EQUIVALENT	SURFACE CONDITIONS	COMMENTS
Hot rolled, annealed, pickled and cold re-rolled		2H	Work hardened	Oiled	Cold worked to achieve higher tensile strength
Cold rolled, annealed and mechanically descaled		2E	ZH	Rough and dull	Usually applied to steels with a scale which is very resistant to pickling solutions
Cold rolled, annealed and pickled	2D	2D	2D	Smooth	Finish for good formability, but not as smooth as 2B or 2R
Cold rolled, annealed, pickled and skinpassed	2B	2B	2B	Smoother than 2D	Most common finish to ensure good corrosion resistance, smoothness and flatness
Cold rolled, bright annealed and light skinpassed	BA	2R	BA	Smoth, bright, mirror-like	Smoother and brighter than 2B
Polished	3	2G	3	Dull	Unidirectional texture
Polished	4	2G	4	Polished, bright	Unidirectional texture
Scotch Brite		2J	Scotch Brite	Brushed	Unidirectional texture Ra<0,2μm
Duplo	4	2K	Duplo	Soft bright polished	Unidirectiona texture, Ra<0,5μm
Transparent coil-coated			Silver Ice®	Steel texture is visible	Anti-fingerprint, easy to clean
Coloured coil-coated		2L	Vernest®	Coloured	General use coloured coating
Pre-primed coil-coated			Primerinox®	Backing coat on B-side	Improves the adhesion of PU/epoxy foams

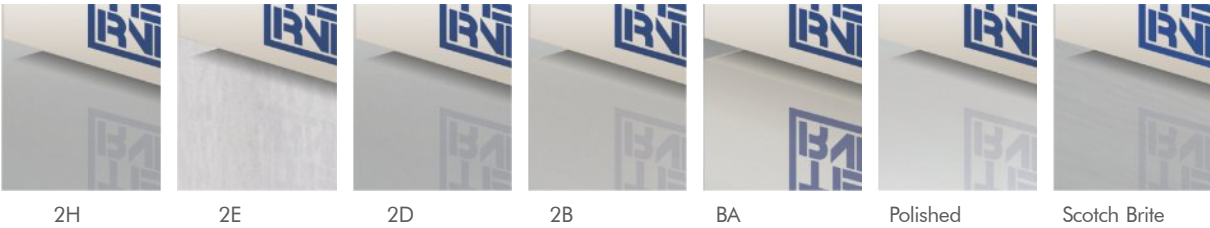

Surface finishes availability must be verified by steel grade on the basis of specific requests

PRE-PAINTED FINISHES

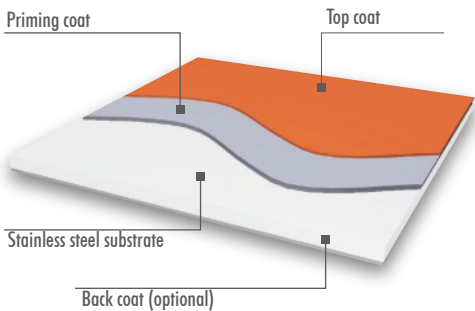

VIVINOX®

Coil coated stainless steel

Available on all ferritic and austenitic grades produced by Acciai Speciali Terni, the organic coatings of the **Vivinox®** range enable to enhance and customise typical stainless steel finishes. With the anti-fingerprint coating **Silver Ice®**, the visual impact of stains and fingerprint smudges is lowered, furthermore, these stains can be dry-cleaned. **Silver Ice®** also offers a limited protection against scratches and corrosion. Stainless steel panels coated with **Vernest®** coloured coatings offer unlimited freedom in the choice of colour schemes for architectural and construction projects.

The organic primer layer applied on the bottom side of the **Primerinox®** products increases the surface energy of stainless steel, allowing for an optimal spread and adhesion of epoxy and PU foams.

The **Vivinox®** organic coatings are applied on stainless steel on a state-of-the-art coil coating line which ensures that the product properties are homogenous over the entire surface of the coil.

PRODUCT RANGE		
	MIN	MAX
Thickness	0,4 mm	1,2 mm
Width	100 mm	1500 mm
Coil weight	2.000 kg	12.000 kg
Surface protection	Temporary protective film on request	
Packaging	Special for coil coated products	

ORGANIC COATINGS			
SERIE		DRY FILM THICKNESS	DESCRIPTION
SILVER ICE®	Transparent finish	1,5 - 3,5 µm	Anti-fingerprint and cleanability properties
VERNEST®	Coloured finish	20 - 25 µm	Polyester, super polyester or PVDF are available for outdoor applications
PRIMERINOX®	Preprimed surface	5 - 8 µm	For foam adhesion, post painting, adhesive structural bonding

Various steel grades and coatings can be provided in agreement with the sales department

STAINLESS STEEL

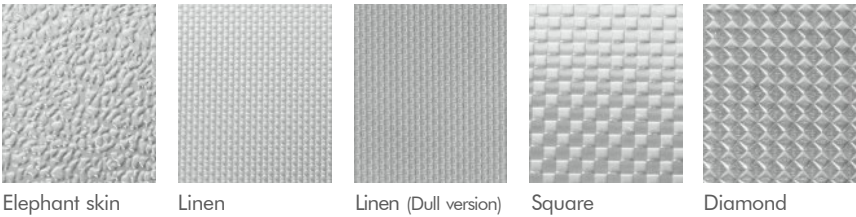

PATTERNED AND
MICRO-PATTERNED FINISHES

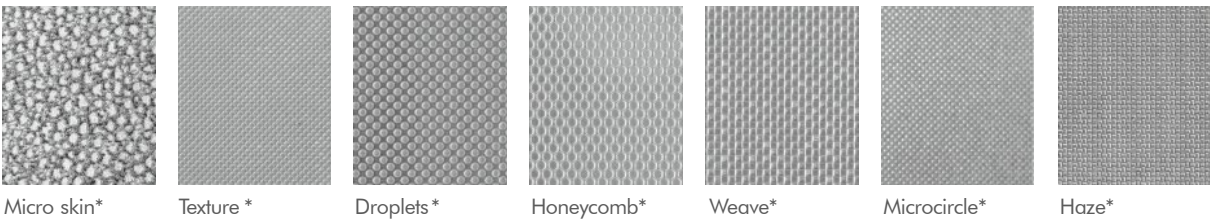

Perfection in all its details

Patterned and micro-patterned finishes are obtained using specifically patterned cylinders during cold rolling operations and followed by bright annealing.

Patterned Finishes

Micro-Patterned Finishes

Personalized patterns on request

AVAILABLE DIMENSIONS			
TYPE	THICKNESS	WIDTH	SHEETS
304 / 430	0,6 ÷ 1,5	500 ÷ 1250	500 ÷ 4000
	0,8 ÷ 1,5	1251 ÷ 1520	500 ÷ 4000

Arvedi AST 

SERVICE CENTERS

Arvedi AST 

Thanks to the CST and Terninox service centers, Arvedi AST offers a wide range of products and services on an international scale. Based on a large range of products from stock, state of the art equipment and high level materials expertise we offer standard and customized services and solutions for slitting, cutting-to-length and surface treatment.

An extensive certified quality management system and technical consultation ensures high quality end-to-end solutions and added value for our customers.

- **Customised packaging and shipping**
- **Supply chain solutions, including stock management**
- **Commercial and technical sales support**
- **Cutting and slitting**
- **Various finishing treatments**

Centro Servizi Terni

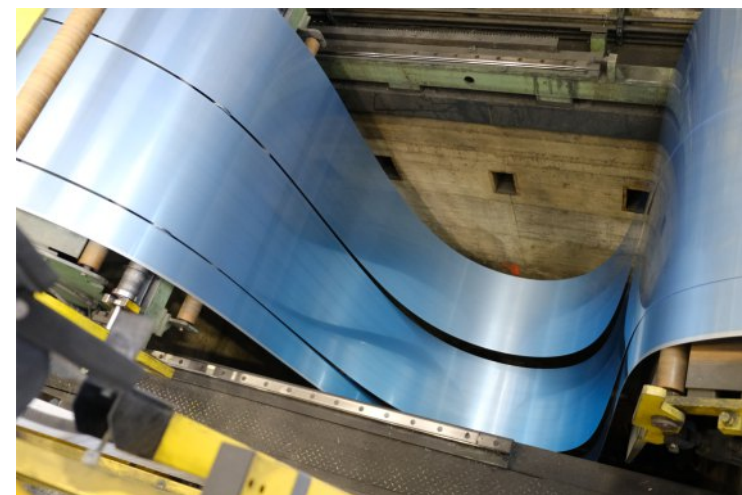

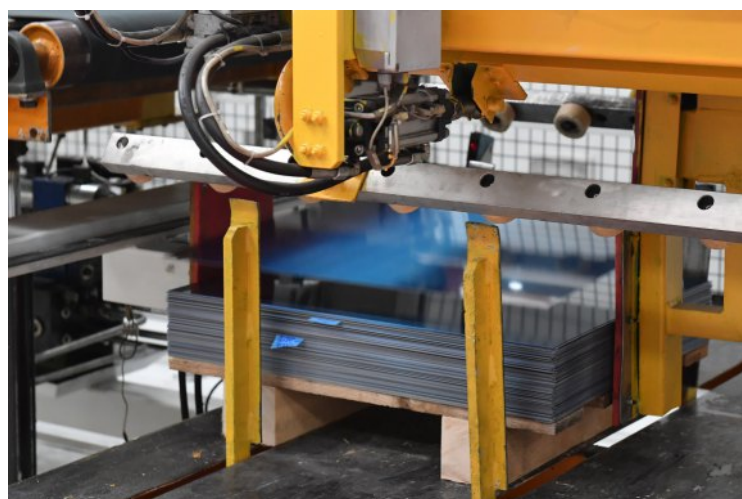

A benchmark for high-quality processing in advanced industrial sectors and high-performance applications, our Service Center is located in Terni, in a strategic position close to production facilities. This location ensures an efficient supply chain and direct access to major Italian and European production sites.

At the end of the production cycle, the material can be further processed at the Centro Servizi Terni to meet the dimensional specifications and aesthetic requirements requested by the customer. Coils are processed into narrow strips, sheets through state-of-the-art slitting and cut-to-length lines.

The Service Center is also specialized in the offer of premium surface finishes, including Scotch-Brite and polished finishes, as well as pre-painted finishes achieved through a dedicated coil coating line.

The integration of production capacity and processing services enables the delivery of complete solutions, ensuring high quality standards, operational flexibility, and reliable lead times.

Location: Terni, Italia

Terninox

Chosen partner for the consumer goods sector and high-quality applications, our Service Center is strategically located close to major Italian stainless steel end users, and to access to Central European regions.

Starting from a careful analysis of customers' technical and commercial requirements, our team of experts develops customized solutions aimed at ensuring the highest level of service.

The synergy between tailor-made services and the high quality of our products enables our customers to fully focus on their core business, enhancing efficiency and competitiveness.

As a stainless-steel Service Center, we offer a wide range of services: from the availability of various grades and surface finishes, to cutting services (slitting and cut-to-length), as well as advanced packaging and supply chain management solutions. Our integrated approach enables us to optimize delivery times and ensure high quality standards throughout the entire value chain.

Location: Milan, Italy

Wooden frame			
Antiparasite wooden frame			
Upper package cover			
Protection between wooden frame and package			
Package covered with plastic film			
Horizontal edge-protections angle pieces			

For applications, destinations and particular transports, specific solutions are guaranteed (special packaging).

QUALITY, SUPPLY CHAIN

Customer requests, our daily commitment

HIGH QUALITY PRODUCTS DEMAND THE HIGHEST SERVICE STANDARDS.

We guarantee the highest quality in technical services and support.

We pursue a digital strategy integrated with automated sales processes, providing excellent solutions to optimise times and methods for managing customer requests.

With the supply chain we work to optimise our logistics processes in a functional and fast way.

From design to delivery, our sales and service network guarantees maximum efficiency.

- Quality Management System
- Dedicated Technical Support
- Supply Chain
- Packaging

QUALITY MANAGEMENT SYSTEM

AST's tradition of managing its production activities through a Quality Management System dates back to the 1970s, when it obtained the ASME (The American Society of Mechanical Engineers) Quality System Certificate. Today, Arvedi AST operates certified management systems in accordance with ISO 9001:2015 (Quality), ISO 14001:2015 (Environment), ISO 45001:2018 (Occupational Health and Safety) and ISO 50001:2018 (Energy), certified by DNV.

Arvedi AST also holds Material Organization certification in accordance with the standards of the American Society of Mechanical Engineers for its Forging Division, as well as IATF 16949:2016 certification (automotive) for the Terni Tube Mill and the CST and Terninox Service Centres.

Acciai Speciali Terni S.p.A. (Arvedi AST), including its Terni production site, Service Centre and Forging Division, has successfully obtained "Core Site Certification" from independent auditors DNV Italia to operate in accordance with the ResponsibleSteel™ standard. ResponsibleSteel™ is an international certification programme for the steel industry. In 2026, Arvedi AST also received DNV's ESG Recognition, acknowledging the adoption of certified management systems compliant with major international standards across the three ESG dimensions: Environmental, Social and Governance.

Arvedi AST also holds the following product approvals and certifications:

- Certification for the production and marketing of products intended for the manufacture of pressure equipment, in compliance with the Pressure Equipment Directive 2014/68/EU, Annex I, Section 4.3, and AD 2000-Merkblatt WO.
- Certificate of conformity of factory production control (CE marking) for the production of stainless steel sheet, plate and strip in accordance with EN 10088-4:2009.
- DNV Maritime and Lloyd's Register marine approvals for its stainless steel products.

Solutions designed to meet various needs

DEDICATED TECHNICAL SUPPORT

High product quality is accompanied by high service specialisation. We work to ensure the highest quality in the technical assistance and support service, as our customer's needs represent a constant commitment throughout each stage of the supply. Our technicians are available to customers to provide product insights, test applications and help them identify the product and finishes best suited to their manufacturing needs.

SUPPLY CHAIN / NEW LOGISTIC SOLUTIONS

From design to delivery, our network of service and sales centres allow us to closely support each customer and also guarantee maximum efficiency in delivery times. Our widespread presence on the market allows us to satisfy every request within competitive times, supported by an innovative IT system and by logistics that simplify and speed up the management of each process.

STAINLESS STEEL

Arvedi AST 

**OUR STAINLESS STEEL IS THE
MATERIAL OF EXCELLENCE FOR
MANY MARKET SECTORS**

Cutting-edge products, quality and new investments to consistently meet customer needs with efficiency and flexibility.

Through its wide range of applications, Arvedi AST's stainless steel production contributes to innovation in some of the most crucial areas of progress.
